

**WiNG-MGR v2**

The WING-MGR application has two components: the firmware (FW - .bin file) and the web pages (GUI - .zip file). Both files are uploaded on the Admin > Firmware page, in the Firmware Updates field.

Firmware Ver.	Web Page Ver.	Features	Release Date
<b>FW 2.0.0</b>	<b>GUI v1.3.0</b>	<ul style="list-style-type: none"> <li>&gt; Security updates</li> <li>&gt; Requires bootloader v2.0.0+</li> </ul>	11/11/2025
<b>FW v1.3.1</b>	<b>GUI v1.3.0</b>	<ul style="list-style-type: none"> <li>&gt; Add offset for WiNG-DAP sensor</li> <li>&gt; Fix Modbus sensor name display</li> <li>&gt; Add WIFI sensor battery alarms</li> <li>&gt; Fix battery alarm thresholds</li> <li>&gt; Fix display of System Configuration → IP →IPv6 Router info</li> <li>&gt; Fix Modbus handling of 125 registers</li> <li>&gt; Change radio information background color depending on installed radio</li> <li>&gt; Add timezone for India +5:30 -- *Note*: Disable Daylight Savings Time (DST) for proper time in India</li> <li>&gt; Add WIFI sensors to wireless network metrics tracking</li> <li>&gt; Add additional humidity validation and filtering</li> </ul>	12/31/2024
<b>FW v1.2.7</b>	<b>GUI v1.2.7</b>	<ul style="list-style-type: none"> <li>&gt; Add support for India/865MHz sensors</li> <li>&gt; Add support for WIFI-CO2 sensor</li> <li>&gt; Downloadable sensor alarms log (alarms.csv)</li> <li>&gt; Editable browser tab title (defaults to product name)</li> <li>&gt; Permit radio card FW updates with alternate processor code</li> </ul>	08/28/2023
<b>FW v1.2.0</b>	<b>GUI v1.2.0</b>	<ul style="list-style-type: none"> <li>&gt; Fix metric setting not persisting across reboots</li> <li>&gt; 868 systems - Fix sensors dropping offline and needing to be added/removed to resume tracking</li> <li>&gt; Fix unit reset occurring on quiet networks with very infrequent traffic</li> </ul>	05/04/2021
<b>FW v1.1.0</b>	<b>GUI v1.12</b>	<ul style="list-style-type: none"> <li>&gt; Fix relay issue for LD and DI sensors introduced in 1.0.29</li> <li>&gt; Fix BACnet issue if there are more than 256 points</li> <li>&gt; Fix sensor service status Modbus register</li> </ul>	03/16/2021
<b>FW v1.0.29</b>	<b>GUI v1.11</b>	<ul style="list-style-type: none"> <li>&gt; Properly show dewpoint for WiFi-TH sensors</li> <li>&gt; Adjust analog sensor logging based on range to support logging of larger values at lower precision</li> <li>&gt; Fix sensor CSV upload issue</li> <li>&gt; Support sensor CSV files from all versions of WingV1</li> <li>&gt; Fix HTTP/HTTPS connectivity issues after an abandoned TCP session</li> </ul>	01/12/2021
<b>FW v1.0.22</b>	<b>GUI v1.9</b>	<ul style="list-style-type: none"> <li>&gt; Initial release</li> </ul>	11/16/2020
